Proof Decision Resolution Pack

Clean proof-decision queue for title, morning-impact, and theology checks

Generated 2026-07-01 from commit f85e049

Readiness Boundary

This pack converts proof findings into decisions. It does not make any file final upload-ready. Applied manuscript edits, final proof, Bible permissions, ISBN/barcode, KDP Previewer, and physical proof review still remain.

Decision Snapshot

- Total decision items: 0
- Duplicate-title decisions: 0
- Repeated morning-impact decisions: 0
- Theology context decisions: 0
- Source words checked by upstream audit: 369,482
- Sunday mentions: 0
- Placeholder markers: 0

Volume Decision Breakdown

Volume	Title	Titles	Impacts	Theology	Total
1	Surrendering to God's Love	0	0	0	0
2	Walking with Jesus	0	0	0	0
3	Filled with the Holy Spirit	0	0	0	0

Priority Theology Contexts

No priority theology contexts remain in the current proof audit. Keep the grace/obedience guardrail visible during the final copyedit.

Recommended Loop

- Proof audit currently shows no duplicate title groups, no repeated morning-impact groups, and no priority theology contexts.
- Run the next full copyedit pass for author voice, devotional flow, and line-level polish.
- Keep the Adventist Sabbath and grace/obedience guardrails visible during final copyedit.
- Regenerate final interiors and covers only after copyedit approval and locked page counts.
- Do not declare KDP final until Previewer and physical proof review pass.
