1 • Executive Summary & How to Read This

This package updates the earlier \$600 agreement. The old agreement named a \$200 deposit and \$400 remaining balance for an initial 31-day devotional / companion journal path. The actual project has expanded into a larger publishing artifact, and this invoice now reflects the confirmed payment arrangement.

TRACK	SCOPE	CURRENT STATUS
Devotional Trilogy	Three 365-day devotional books with author-review HTML editions and proof-PDF lanes.	Review portal live; final KDP proof gates pending.
Companion Journals	Three paired journals aligned with the devotional books.	Draft/proof links staged; final print files pending.
Expansion Products	31-day visual devotional and Juan R. Damon testimony book.	Included in package; testimony source intake/structure still needs controlled buildout.
Publishing System	Hub, invoice, dashboard, author review site, product website shell, Stripe link.	Built and attached to the live Vercel review package.

2 • Recommended Execution

Finalize first.

Freeze scope and source files before generating new assets. The project already has enough material to overwhelm the review process.

Publish with proof.

Move from review HTML/PDF drafts into KDP-ready interiors, final cover wraps, Previewer checks, and physical proof review.
