Main Author-Voice Queue

Type	Count	Pattern	Recommended action
Repeated sentence	131	Let the Spirit press this from information into formation.	Rewrite Volume 3 formation bridges so the Spirit language feels alive and not template-driven.
Repeated sentence	130	Do not rush past the verse; let it steady you before you move.	Vary the intake line with fresh morning verbs: sit, receive, notice, breathe, confess, carry.
Repeated sentence	129	Let prayer turn insight into obedience before noon.	Keep obedience-as-response, but write more specific today-sized applications.
Repeated sentence	127	Take one surrendered step before worry gets the first word.	Replace repeated surrender line with concrete steps tied to each day's passage.
Repeated sentence	125	Start from what God has revealed, not from what the day is demanding.	Vary the opening claim so it sounds like Lady D speaking into that specific morning.
Repeated sentence	125	This day falls on Saturday, the seventh-day Sabbath in the 2026 production calendar.	Keep the Saturday Sabbath truth, but move repeated production-calendar wording into a reusable Sabbath note or vary it by entry.
Repeated sentence	73	Walk out of this page with courage, tenderness, and clarity.	Review in the author-voice pass and vary where repetition sounds mechanical rather than intentional.

Judge And Auditor Loops

Loop	Pass count	Standard
Voice judge	3 passes per batch	Sounds like Lady D sitting with the reader in the morning: warm, reverent, direct, practical, not generic or academic.
Theology auditor	3 to 7 passes when needed	Saturday Sabbath is protected, obedience is response to grace, and Father/Son/Spirit lanes stay distinct without separating God.
Repetition auditor	3 passes per volume after every rewrite wave	No mechanical openings, repeated prayers, recycled morning-impact lines, or repeated bridge sentences unless deliberately liturgical.
Permissions auditor	1 pass every release build	References-only remains safe until a final Bible translation and copyright notice are locked.
Production auditor	1 pass every artifact build	Markdown, DOCX, PDF, ZIP, public download links, and Vercel pages all match the same current evidence.

Recommended Goal-Mode Settings

Phase	Recommended	Use for
Batch rewriting	Best available flagship writing/reasoning model, medium reasoning	Rewriting 7 to 14 entries at a time while preserving Scripture reference, day title, prayer, journal prompt, and Adventist guardrails.
Judge and auditor loop	Best available flagship model, extra-high reasoning	Theology, voice, repetition, permissions, and KDP readiness audits. Use three passes for routine batches and up to seven for difficult theological or voice sections.
Mechanical checks	Fast or spark-class model	Link checks, count verification, HTML index updates, artifact inventories, and non-theological formatting checks.
Cover and visual prompts	GPT image workflow with the strongest available image model and high-quality portrait/book-cover settings	6 x 9 cover variants, typography-free concept art, full-wrap direction boards, and visual comparison sheets.

Release Boundary

This package is an author-voice copyedit gate, not a final KDP upload approval.

The reader-facing lens labels are clean across the 1,098 source entries and public mirrors.

The next manuscript work is a line-level voice and rhythm pass, followed by Bible permissions, final interiors, cover regeneration from locked page counts, KDP Previewer, and physical proof review.
